Eastern District of Virginia

The Racketeering Scheme was not well understood by anyone including some of its victims. Veronica Hoffman was rising fashion, web, and erotic artists. She was a devoted Jewish activist with a loving following in the Hollywood area she lived in with at least one roomate in a $4,000 dollar month home. She was tricked into "just for fun and such a lark to try on a Nazi halloween like costum and later was surrounded by Alt-Right role-players stalking her pretending to be her Neo Nazi allies. Smear campaign. And she was linked to me when first asked to discredit me but once linked to me then discredited as my Nazi ally. Tom Dunhan workd in the fiancial business, regulated and bond-required work (such as the work I did at Wells Faro) insurance web site sales system also (like Wells Fargo) subject to Secret Service regulations and scrutiny. False financial data was entered into his background by faked repoorts of derogatory records, allegations he was a delusional person, and having affairs when for all of us nothing about mached the smears but calcluated attacks on our lives led to the smears.

So if the scheme was persecuting connected people forming a ring aound me Ed Donegan and persecuting me as well the longer vision goal is revealed, and the program was designed not to leave any traces of a very ilegal and very deeply connected racketting criminal network of infiltration and sabotouge still operating today for reason that go back to Atomic Testing and Kennedy era history and not various view of me or anyone else who underwent smears.

What did the empty suits get from me?

"There are no secrets in the Age of the IP Address" was the theme of Real Harm Real Foul that distorted social theories were a disaster for the USA. The harm was real to the USA and distorting genomic information, softselling or denying IQ pressures that were existent in the world, may have been polite but led to distorted policies. I continued this as *science* inte *Age of Reason* we needed solid science not "priest craft" of Ethicists. All of this was DARVO reversed by left wing and Black Lives Matter studies of me and things like touring the USSR in the 1970's and hearing about GDP, The Five Year Plans, and centrally planned economies and related failures my father and I talked about through out lives together became part AOC's congressional agendas DARVO reversals. So maybe my "truths" I held as beleifs were transmitted to others in a distored way their own "truths" based on their intelects.

> The Wolf wears wools not to stay warm but to get close to other sheep. And one most remember the Wolf gained its wool from its first Sheep victim. This is the Infiltration strategy seeming in

> use by the FBI DHS and Jessica Aber and black "illuminati family members" I encounted in the DOD Veteran's facility as we discused Age of Reason, Elightemnent, and the Scientific Revolution during counseling sessions.

Knowlege of national security matters, knowledge of personality disorders, and knowlege of high tech systems to communicat with. What I was suited up in: Anti sociology. I was tired of hearing about the "disenfranchised" and used the term "dissafected" for those who went into acive rebellioin burning cities, etc., and I circled this that the New York Criminal Division of the FBI was ghosting me on this with the help of grants authorizer Vernellia Randall. I did not require of them to give a grant, high tech and the genome from binary bit settings infomation theory, but I wanted to know some Western Civilizaztion author was included.

I had been arested on that National Security issues web site where I had quoted (before my 2007 arrest) the Nixon Center articles about coping with the 1960's and 1970's, etc, Afte my release I happpend into my own dress. Not by active choice but as a very good deal I got a shirt-sweater on sale that actually fit my and looked like Europan police. It was moslly black fabric but had faux-leather patches around the top of the chest and shoulders looking almost like paramilitary. At the same time I was writing about emotional volatility and game-theory, how to exit situaions that are loosing sitations, win loss and win win, etc., and html encoding all of it and writing at intelectuals far beyond what any mental health worker had ever been exposed to.

It is still true and even more true that "*There are no secrets in the age of the IP Address* because you will never see in the Mainstream Media the mining and Suharto story and Indonesia overthrows story but as I said years ago sites doe exist reporting much of this and today in AI it getting more easily brought together in what is known concentrated quickly and easiliy. Filling in the details is more the issue if if Mainstream Media still is blind to it all in most media coverages.
